Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.87% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

performances réalisables.

Les activités alignées sur la taxinomie

sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.75%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 0.28%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **28.66%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 10.00% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

● ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

● ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

● ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL EQUITY DYNAMIC MULTI FACTORS

Identifiant d'entité juridique :
549300YXILW3O14Y0587

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ ☐ Oui	☒ ☐ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 36.24% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI World (dividend reinvested) Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.079 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.179 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente :

- La note ESG moyenne pondérée du portefeuille était de **0.21 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG était de **-0.12 (D)**.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières

et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- **Exclusion :** Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- **Engagement :** L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- **Vote :** La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- **Surveillance des controverses :** Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des

analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.17% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la taxinomie de l'UE¹ ?**

☐ Oui :

☐ Dans le gaz fossile ☐ Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.25%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 0.51%.

sont des

investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **22.57%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 13.50% à la fin de la période.

● **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies.

● **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EUROPEAN CONVERTIBLE BOND

Identifiant d'entité juridique :
529900644PSS3LALW918

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de **67.52%**

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **REFINITIV EUROPEAN CONVERTIBLE HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.037 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.675 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.94 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.71 (C).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de

l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par

exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
SCHNEIDER ELEC 1.97% 11/30 CV	Industrie	Biens d'équipement	France	4.50%

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et,

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.00% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux

entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.*

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 2.56%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 4.23%.

sonnent des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en

● Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **44.43%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 20.09% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 9, paragraphes 1, 2 et 4a, du Règlement (UE) 2019/2088 et à l'Article 5, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
Amundi Funds Montpensier Global Convertible Bond

Identifiant d'entité juridique :
529900LZ9GLOP969J692

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐	Oui	☒ ☐ X	Non
☐	Il a réalisé des investissements durables ayant un objectif environnemental : _____	☒ X	Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 34.1%
☐	☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ X	☒ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif social
☐	Il a réalisé des investissements durables ayant un objectif social : _____	☐	Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Une société est identifiée comme durable par le gestionnaire d'actifs, par le biais de la méthodologie décrite dans la Politique ESG disponible sur le site Web montpensier.com.

Dans quelles mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint ?

Le fonds intègre des facteurs de durabilité dans son processus d'investissement, comme indiqué plus en détail ci-dessous et dans le chapitre « Stratégie d'investissement » du Prospectus.

Les critères ESG sont pris en compte par le fonds afin d'unifier la performance financière et le souhait d'influencer l'émetteur de manière positive, si possible, en matière de performance ESG, en encourageant les entreprises à améliorer l'intégration de critères ESG à leurs activités et en valorisant les bonnes pratiques.

La société de gestion a appliqué la politique décrite dans le Document précontractuel pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier alinéa du Règlement (UE) 2020/852.

34.65% du portefeuille investi à l'exclusion de la catégorie trésorerie et équivalents de trésorerie et de tout organisme de placement collectif (soit 34.09% de l'actif net du fonds) sont constitués d'investissements durables.

L'empreinte carbone et l'intensité carbone moyenne pondérée du portefeuille sont considérablement inférieures à celles de l'indice.

Les proportions restent les mêmes en ajoutant les émissions de catégorie Scope 3: l'intensité et l'empreinte carbone du portefeuille sont nettement inférieures à celles de l'indice.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité ?**

1.1. Performance environnementale

Conformité au Pacte mondial : pourcentage de sociétés en portefeuille identifiées comme respectant les principes du Pacte mondial des Nations Unies.

● ... et par rapport aux périodes antérieures ?

Voir plus haut.

● Quels étaient les objectifs des investissements durables que le produit financier avait partiellement réalisés, et comment l'investissement durable a-t-il contribué à ces objectifs ?

La méthodologie de Montpensier Finance pour identifier les investissements durables repose sur les composantes suivantes :

- évaluation de la contribution à l'objectif de durabilité, qui repose sur une approche d'obligation de moyens, dans le but de sélectionner les « meilleures performances » (ou de supprimer les « moins bonnes performances ») à partir de critères environnementaux (E) et/ou sociaux (S), ainsi que sur une approche basée sur les Objectifs de développement durable (ODD) et une exposition aux activités durables, déterminée via une définition interne des « activités définies comme durables » ;
- Évaluer le respect des principes de bonne gouvernance, sur la base de notre analyse de l'alignement des intérêts entre la direction, les actionnaires et les parties prenantes en général ;
- évaluation du principe consistant à « ne pas causer de préjudice important » (Do Not Significantly Harm, « DNSH »), qui repose sur des exclusions sectorielles, les Principales incidences négatives (PAI) et la surveillance des controverses, y compris en termes de gouvernance.

Pour plus d'informations, veuillez consulter le Prospectus ainsi que le document pré-contractuel SFDR annexés au prospectus de l'OPC, disponibles sur le site Web de la société de gestion.

● Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable ?

Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?

L'évaluation du principe consistant à « ne pas causer de préjudice important » (Do Not Significantly Harm, « DNSH ») repose sur des exclusions, les Principales incidences négatives (PAI) et la surveillance des controverses. De plus, les entreprises présentant une analyse d'impact environnemental ou social MIA (Montpensier Impact Assessment) négative, ou qui sont des piliers environnementaux (E) ou sociaux (S), sont considérées comme dérogeant au principe DNSH.

Pour plus d'informations, veuillez consulter le Prospectus ainsi que le document pré-contractuel SFDR annexés au prospectus de l'OPC, disponibles sur le site Web de la société de gestion.

Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :

Nous excluons de notre univers d'investissement les entreprises qui ne sont pas alignées sur certaines normes et conventions internationales, notamment le Pacte mondial des Nations unies (PMNU), les règles de l'Organisation internationale du travail (OIT) et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme (UNGPHR).

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Les entreprises qui font l'objet d'une controverse de niveau « Rouge » sont exclues de l'univers d'investissement. Parmi ces controverses de niveau « Rouge » figurent des entreprises qui ne respectent pas le Pacte mondial des Nations unies (droits de l'homme, normes du travail, environnement et lutte contre la corruption).

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Nous tenons compte des principaux indicateurs relatifs aux incidences négatives dans la politique d'exclusions sectorielles et normatives, l'analyse des pratiques de bonne gouvernance (en nous appuyant sur l'analyse exclusive « Montpensier Governance Flag » ou MGF), l'analyse qualitative exclusive de la contribution des entreprises à la transition environnementale et à la transition solidaire (analyse d'impact « Montpensier Impact Assessment » ou MIA et analyse de la contribution des entreprises par secteur « Montpensier Industry Contributor » ou MIC), et/ou dans l'analyse des éco-activités qui détermine la contribution à un ou plusieurs Objectifs de développement durable (ODD) de l'ONU.

La pertinence et la couverture de ces indicateurs varient selon le secteur et la région dans lesquels exercent les entreprises.

Les informations concernant les objectifs environnementaux, sociaux et de gouvernance (ESG) sont consultables sur le site Web de la société de gestion :

<https://www.montpensier.com/sites/default/files/public/documents/politique-esg.pdf>

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Les investissements sous-jacents à la portion restante de ce produit financier ne tiennent pas compte des critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Quels ont été les principaux investissements de ce produit financier ?

Principaux investissements	Secteur	% des actifs	Pays

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

La base de calcul des pourcentages mentionnés ci-dessous est l'actif net du fonds.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

de l'actif net du fonds au 28/06/2024

Classification « Industry Classification Benchmark » (ICB) - 11 secteurs d'activité

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035.

Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐ Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

☒ Non

Les données relatives à l'implication dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la taxinomie sont déterminées en tenant compte uniquement des données publiées par les entreprises.

Les données concernant l'implication des entreprises dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la taxinomie ne sont pas encore disponibles.

À titre d'information, les actions d'entreprises identifiées comme impliquées dans des activités liées à l'énergie fossile et/ou nucléaire représentent 7.03% du portefeuille, soit 5.80% du portefeuille pour les actions d'entreprises tirant une partie de leur chiffre d'affaires de l'énergie nucléaire et 2.37% pour les actions d'entreprises impliquées dans l'énergie fossile.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

Le chiffre d'affaires est estimé par MSCI ESG Research conformément à la méthodologie décrite ci-dessous.

Les données de CapEx et OpEx ne prennent en compte que les données publiées par les entreprises.

Alignement sur la taxinomie européenne

L'alignement sur la taxinomie européenne est estimé par MSCI ESG Research, à partir du pourcentage maximal des ventes d'une entreprise découlant de produits et services répondant à des objectifs environnementaux, sur la base du cadre MSCI Sustainable Impact Metrics.

Le pourcentage des ventes généré par les produits et services qui répondent aux objectifs environnementaux est réduit à 0 pour les entreprises qui ne respectent pas les critères de la taxinomie européenne consistant à « ne pas causer de préjudice important » et à adopter des « garanties sociales minimales ».

Le même principe s'applique aux entreprises dont le chiffre d'affaires découle à hauteur de 5% ou plus de la fourniture, distribution ou vente au détail de produits issus du tabac, et aux entreprises impliquées dans les armes controversées.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :
- du chiffre d'affaires, pour refléter le caractère écologique actuel des sociétés bénéficiaires des investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, ce qui est pertinent pour une transition vers une économie verte ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Le fonds ne dispose pas d'une proportion minimale d'investissements dans des activités transitoires ou habilitantes.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

	28/06/24	30/06/23
Alignement sur la taxinomie européenne	% des actifs sous gestion	% des actifs sous gestion
Amundi Funds Montpensier Global Conve	8.4%	9.5%

Le pourcentage indiqué ci-dessus représente la contribution du portefeuille à l'alignement sur la taxinomie européenne (sur la base du chiffre d'affaires) de tous les investissements durables, que leur objectif soit environnemental ou social.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

À la date du présent rapport, 6.3% de l'actif net étaient investis dans des investissements durables ayant un objectif environnemental, tandis que 0.8% de l'actif net n'étaient pas alignés sur la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

À la date du présent rapport, 27.8% de l'actif net étaient investis dans des investissements durables ayant un objectif social.

Quels investissements étaient inclus dans la catégorie « Non durables », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

La trésorerie, les équivalents de trésorerie et les fonds ou dérivés de couverture représentent 1.6% de l'actif net du fonds et n'offrent pas de garanties environnementales ou sociales minimales.

Quelles mesures ont-elles été prises pour atteindre l'objectif durable au cours de la période de référence ?

La société de gestion a appliqué la politique décrite dans les informations précontractuelles pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier alinéa du Règlement (UE) 2020/852.

La politique en matière d'engagement des actionnaires de Montpensier Finance se compose d'une politique de vote et d'une politique d'engagement.

L'exercice de droits de vote est un élément important du dialogue avec les émetteurs. Il encourage les bonnes pratiques de gouvernance et promeut l'éthique professionnelle.

Montpensier Finance considère que l'exercice des droits de vote fait partie intégrante du processus de gestion des investissements et qu'il doit être effectué dans l'intérêt de ses clients. La politique en matière de droits de vote de Montpensier Finance vise la promotion de la valorisation à long terme de ses investissements dans le fonds.

Pour exercer les droits de vote attachés aux titres détenus par le fonds, les gestionnaires du fonds se réfèrent aux principes concernant les recommandations de gouvernance d'entreprise publiées par ISS Governance dans sa Politique de durabilité. ISS couvre toutes les entreprises détenues dans les portefeuilles des fonds gérés par Montpensier Finance.

Les réglementations en matière de gouvernance exigent aux gestionnaires de portefeuille d'exercer leurs fonctions de manière indépendante, en particulier concernant les émetteurs, et dans le strict intérêt des porteurs de parts ou actionnaires. Les gestionnaires de portefeuille sont particulièrement attentifs aux décisions susceptibles de nuire aux intérêts des porteurs de parts ou actionnaires.

La politique complète en matière de vote ainsi que le dernier rapport sur l'exercice des droits de vote sont disponibles sur notre site Web.

Montpensier Finance complète sa politique de vote par une politique d'engagement.

Les équipes de gestion du fonds sont encouragées à soulever toute question qui se pose auprès des entreprises au cours des réunions, en particulier lorsque les problèmes en matière d'ESG ne sont pas suffisamment pris en compte, afin d'encourager ces entreprises à améliorer leurs pratiques concernant les questions environnementales, sociales et de gouvernance, qui constituent toutes des facteurs de croissance durable.

Les gestionnaires du fonds, assistés par les analystes ISR, établiront une entente positive et constructive à moyen et long termes avec les entreprises détenues dans le portefeuille.

Cette entente comporte de multiples facettes :

- ✓ Contacts avec l'entreprise
- ✓ Communication des intentions de vote des gestionnaires du fonds à la société avant l'assemblée générale

Outre les initiatives d'engagement directes que nous menons généralement avec les petites et moyennes entreprises, Montpensier Finance participe également à des actions d'engagement par groupe mises en œuvre par ISS dans le cadre de son programme ISS ESG spécialement pour les grandes entreprises.

Ce dialogue est mis en place avec plusieurs objectifs :

- ✓ Encourager les entreprises à mettre en place un engagement ESG
- ✓ Encourager les entreprises à communiquer sur leurs pratiques ESG

La politique complète en matière d'engagement ainsi que le dernier rapport sur l'engagement sont disponibles sur notre site Web.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier atteint l'objectif de durabilité.

Le fonds n'utilise pas d'indice de référence durable. Sa performance en matière de durabilité est comparée à celle de son indice de référence : Stoxx Global 1800

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

N/A

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

N/A

● *Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?*

N/A

● *Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?*

Voir plus haut la comparaison entre les indicateurs de performance du fonds et de son indice de référence et les indicateurs de durabilité.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EURO AGGREGATE BOND

Identifiant d'entité juridique :
529900DJK6EP37QSNF19

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ Oui	☒ ☐ Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 43.46% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **85% BLOOMBERG EURO AGGREGATE (E) + 10% ICE BOFA GLOBAL HIGH YIELD INDEX + 5% JP MORGAN EMBI GLOBAL**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.036 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.930 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.15 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.93 (C).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de

l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement

l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.43% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.03% et la part d'investissements dans les activités habilitantes était de 0.30%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Où se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 10.79%.

 sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

● Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 37.93% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.09% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EURO
CORPORATE ESG BOND

Identifiant d'entité juridique :
EJCJD2QBJY0UVP7HMP10

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de **58.49%**

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG EURO AGGREGATE CORPORATE (E)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.030 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.537 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.83 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.55 (C).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés

comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la

énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

période sous revue, il a cependant investi 1.91% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐ Oui :

☐ Dans le gaz fossile ☐ Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.09% et la part d'investissements dans les activités habilitantes était de 1.22%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 15.27%.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **53.80%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 2.78% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
STRATEGIC BOND

Identifiant d'entité juridique :
5493009E9QZ9NKKEW632

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ ☐ Oui	☒ ☐ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 28.38% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDICE AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.151 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.20 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du

secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMU PLAN-EM GR ONE-SEN USDC	Obligations financières	Fonds communs de placement	Luxembourg	3.26%

Quelle était la proportion d'investissements liés à la durabilité ?

- **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
<i>Obligations d'entreprise</i>	<i>Banques</i>	19.11%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.55% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.10% et la part d'investissements dans les activités habilitantes était de 0.10%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 3.47%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 22.31% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.52% à la fin de la période.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental, visés par le Règlement (UE) 2020/852.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EURO HIGH YIELD BOND

Identifiant d'entité juridique :
E1BBUNTIB1P10L18SD26

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ Oui	☒ Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 43.32% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA BB-B EUROPEAN CURRENCY HIGH YIELD CONSTRAINED INDEX HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.487 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.315 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.28 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.16 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières

et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution

des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMUNDI EURO LIQUIDITY SRI - Z (C)	Obligations financières	Fonds communs de placement	France	4.37%

<i>Obligations d'entreprise</i>	<i>Sociétés financières</i>	0.00%
<i>Liquidités</i>	<i>Liquidités</i>	-1.50%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.69% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la taxinomie de l'UE¹ ?**

☐ Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.02% et la part d'investissements dans les activités habilitantes était de 0.37%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Où se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 7.54%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **34.48%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 8.15% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EURO
HIGH YIELD SHORT TERM BOND

Identifiant d'entité juridique :
529900Q3IK91XCA88E07

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ ☐ Oui	☒ ☐ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 41.45% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA Q759 CUSTOM INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.567 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.309 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.34 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.04 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent

plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de gestion de la sécurité et de gestion des déchets.

Les activités habilitantes permettent

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.79% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

☐ Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.*

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.27%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 14.63%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **32.05%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 8.61% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL SUBORDINATED BOND

Identifiant d'entité juridique :
549300YM7XSURJOGN349

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ ☐ **Oui** ☒ ☐ ☒ **Non**

☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ Il a réalisé des investissements durables ayant un objectif social : _____	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 41.38% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social ☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **30% ICE BOFA CONTINGENT CAPITAL HEDGED INDEX + 15% ICE BOFA PERPETUAL PREFERRED SECURITIES HEDGED INDEX + 37.5% ICE BOFA GLOBAL HYBRID NONFINANCIAL CORPORATE HEDGED INDEX + 17.5% ICE BOFA GLOBAL HYBRID NONFINANCIAL HIGH YIELD HEDGED INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.506 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.420 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.51 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.50 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le

cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- **Exclusion :** Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- **Intégration des facteurs ESG :** Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- **Engagement :** L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- **Vote :** La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

- Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	47.97%
Obligations d'entreprise	Obligations financières - autres	9.93%
Obligations d'entreprise	Assurance	9.05%
Obligations d'entreprise	Énergie	8.46%
Obligations d'entreprise	Électricité	7.73%
Obligations d'entreprise	Biens de consommation de base	3.77%
Obligations d'entreprise	Sociétés financières	1.97%

Obligations d'entreprise	Gaz naturel	1.86%
Obligations d'entreprise	Industries de base	1.30%
Obligations d'entreprise	Sociétés de courtage	0.69%
Obligations d'entreprise	Immobilier (REIT)	0.68%
Obligations d'entreprise	Transport	0.61%
Valeurs du Trésor	Valeurs du Trésor	0.00%
Obligations d'entreprise	Consommation discrétionnaire	-0.04%
Forex	Forex	-0.37%
Liquidités	Liquidités	6.39%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.21% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

⁴Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 6.97%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **37.64%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas**

compte des critères en matière d'activités économiques durables sur le plan environnemental, visés par le Règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.53% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
PIONEER GLOBAL HIGH YIELD BOND

Identifiant d'entité juridique :
5493001ZUQBYXT5ICJ95

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ ☐ Oui	☒ ☐ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 14.50% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG GLOBAL HIGH YIELD**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.102 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.259 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.09 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.24 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés

comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les

émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs
décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.00% dans des investissements durables alignés sur la Taxinomie de l'UE.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 1.23%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 9.24% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.26% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL HIGH YIELD ESG IMPROVERS
BOND

Identifiant d'entité juridique :
213800O2125EN6NGE460

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de **31.60%**

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA GLOBAL HIGH YIELD INDEX HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille.

L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante :
 - exclusions légales sur les armes controversées ;
 - entreprises qui contreviennent de façon grave et répétée à un ou plusieurs des 10 principes du Pacte mondial de l'ONU sans appliquer de mesures correctives crédibles ; et
 - exclusions sectorielles du groupe Amundi sur le charbon et le tabac (les détails de cette politique étant disponibles dans la Politique d'investissement responsable d'Amundi consultable sur le site Web www.amundi.fr).
2. Aucun investissement n'a été réalisé auprès d'émetteurs ayant la note F ou G. Pour tout émetteur dont la notation a été revue à la baisse et ayant reçu la note F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.
3. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'univers d'investissement du fonds après suppression de 20% des émetteurs les moins bien notés.
4. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

Le gestionnaire des investissements a concentré le processus de placement sur les entreprises/secteurs/pays ayant suivi une trajectoire positive en termes de critères ESG au sein de leur activité, ou prévoyant de suivre une telle trajectoire. Le gestionnaire des investissements a identifié des opportunités de placement alignées sur l'objectif de génération d'alpha en se concentrant en particulier sur l'inclusion des entreprises/secteurs/pays qui seront de solides gagnants en termes de critères ESG à l'avenir, qui présentent (ou présenteront) une amélioration favorable du profil ESG, tout en investissant également dans des entreprises/secteurs/pays qui sont actuellement des références en matière d'ESG.

Par ailleurs, le Compartiment a obtenu pour son portefeuille une note ESG qui est supérieure à celle de l'Indice de référence. Le Compartiment a été comparé à la note ESG de son Indice de référence après avoir exclu dudit Indice de référence 20% des titres présentant les notes ESG les plus faibles.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● *Quelle performance ont affiché les indicateurs de durabilité ?*

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.371 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.303 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.29 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.29 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● **Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?**

Les principales incidences négatives correspondent

aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs

Forex	Forex	-1.00%
Liquidités	Liquidités	3.82%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.01% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 1.18%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 24.23% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 7.36% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS US
HIGH YIELD BOND

Identifiant d'entité juridique :
5493003QDKL8L48UQW51

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ Oui	☒ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de <u>18.26%</u> ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA US HIGH YIELD INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.238 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.457 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.28 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.16 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de

l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les

émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TBIP USA 02/07/24	Valeurs du Trésor	Valeurs du Trésor	États-Unis	3.55%
CHTR 4.75% 02/32 144A	Obligations d'entreprise	Communications	États-Unis	1.44%
PROFUN 6.375% 06/25 144A	Obligations d'entreprise	Sociétés financières	États-Unis	1.33%
MAGLLC 4.875% 05/29 144A	Obligations d'entreprise	Consommation discrétionnaire	États-Unis	1.27%
SOLEIN 9.75% 11/28 144A	Obligations d'entreprise	Industries de base	États-Unis	1.14%
MHED 8% 08/29 144A	Obligations d'entreprise	Communications	États-Unis	1.14%
GALCLD FRN 09/24 144A	Obligations d'entreprise	Sociétés financières	Îles Caïmans	1.11%
AETUNI 8.25% 02/26 144A	Obligations d'entreprise	Énergie	États-Unis	1.08%
MATV 6.875% 10/26 144A	Obligations d'entreprise	Industries de base	États-Unis	1.03%
WIN 7.75% 08/28 144A	Obligations d'entreprise	Communications	États-Unis	0.97%
PRSESE 6.25% 01/28 144A	Obligations d'entreprise	Consommation discrétionnaire	États-Unis	0.96%
BID 7.375% 10/27 144A	Obligations d'entreprise	Consommation discrétionnaire	États-Unis	0.94%
VST 7.75% 10/31 144A	Obligations d'entreprise	Électricité	États-Unis	0.94%
PSLOGI 7.875% 10/29 144A	Obligations d'entreprise	Transport	États-Unis	0.93%
VSTJET 6.375% 02/30 144A	Obligations d'entreprise	Transport		0.92%

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Consommation discrétionnaire	19.39%
Obligations d'entreprise	Énergie	11.85%
Obligations d'entreprise	Communications	11.03%
Obligations d'entreprise	Biens de consommation de base	10.43%
Obligations d'entreprise	Industries de base	9.78%
Obligations d'entreprise	Biens d'équipement	9.59%
Obligations d'entreprise	Sociétés financières	6.84%

<i>Obligations d'entreprise</i>	<i>Transport</i>	<i>3.99%</i>
<i>Obligations d'entreprise</i>	<i>Électricité</i>	<i>3.73%</i>
<i>Valeurs du Trésor</i>	<i>Valeurs du Trésor</i>	<i>3.55%</i>
<i>Obligations d'entreprise</i>	<i>Technologie</i>	<i>2.34%</i>
<i>Obligations d'entreprise</i>	<i>Banques</i>	<i>0.93%</i>
<i>Obligations d'entreprise</i>	<i>Industries - autres</i>	<i>0.78%</i>
<i>Obligations d'entreprise</i>	<i>Immobilier (REIT)</i>	<i>0.75%</i>
<i>Technologies de l'information</i>	<i>Semi-conducteurs et équipement pour semi-conducteurs</i>	<i>0.59%</i>

<i>Obligations financières</i>	<i>Services financiers</i>	<i>0.30%</i>
<i>Santé</i>	<i>Pharmacie, biotechnologie et sciences de la vie</i>	<i>0.21%</i>
<i>Santé</i>	<i>Matériel et services de santé</i>	<i>0.07%</i>
<i>Autres</i>	<i>Autres</i>	<i>-0.10%</i>
<i>Liquidités</i>	<i>Liquidités</i>	<i>1.76%</i>

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.00% dans des investissements durables alignés sur la Taxinomie de l'UE.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐ Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 0.25%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **9.01%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 9.25% à la fin de la période.

● **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

● **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EUROPEAN SUBORDINATED BOND ESG

Identifiant d'entité juridique :
2221006F1314ERENWD22

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ ☐ Oui	☒ ☐ ☒ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 65.95% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG EURO AGGREGATE CORPORATE (E)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.097 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.537 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.93 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.55 (C).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des

facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir :
du
01/07/2023 au
30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMUNDI EURO LIQUIDITY SRI - Z (C)	Obligations financières	Fonds communs de placement	France	5.47%
BKO 2.9% 06/26	Valeurs du Trésor	Valeurs du Trésor	Allemagne	4.39%
AMUNDI EURO LIQUIDITY-RATED SRI - Z (C)	Obligations financières	Fonds communs de placement	France	2.88%

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

<i>Secteur</i>	<i>Sous-secteur</i>	<i>% des actifs</i>
<i>Obligations d'entreprise</i>	<i>Banques</i>	<i>54.04%</i>
<i>Obligations financières</i>	<i>Fonds communs de placement</i>	<i>9.45%</i>
<i>Obligations d'entreprise</i>	<i>Assurance</i>	<i>8.50%</i>
<i>Obligations d'entreprise</i>	<i>Électricité</i>	<i>6.74%</i>
<i>Valeurs du Trésor</i>	<i>Valeurs du Trésor</i>	<i>4.39%</i>
<i>Obligations d'entreprise</i>	<i>Communications</i>	<i>3.49%</i>
<i>Obligations d'entreprise</i>	<i>Obligations financières - autres</i>	<i>2.73%</i>
<i>Obligations d'entreprise</i>	<i>Consommation discrétionnaire</i>	<i>2.52%</i>
<i>Obligations d'entreprise</i>	<i>Immobilier (REIT)</i>	<i>2.41%</i>
<i>Obligations d'entreprise</i>	<i>Gaz naturel</i>	<i>1.52%</i>
<i>Obligations d'entreprise</i>	<i>Énergie</i>	<i>1.31%</i>

Obligations d'entreprise	Biens d'équipement	0.74%
Obligations d'entreprise	Transport	0.64%
Forex	Forex	0.02%
Autres	Autres	0.01%
Liquidités	Liquidités	1.48%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.28% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.56%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 12.91%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

● Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **61.90%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 2.78% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL AGGREGATE BOND

Identifiant d'entité juridique :
1BXU0IWD1154BQDOY676

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ ☐ Oui	☒ ☐ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de <u>39.84%</u> ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL + 10%. ICE BOFA GLOBAL HIGH YIELD INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.942 (C)**
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.488 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.92 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.51 (C).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de

l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les

émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est

ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/24**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	42.42%
Obligations d'entreprise	Banques	22.00%
Créances titrisées	Titres MBS émis par des agences	9.90%

------------	------------	--------

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.06% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

aux meilleures performances réalisables.

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :
 - du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
 et
 - des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.10%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 12.60%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **31.05%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 2.79% à la fin de la période.

Les investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL CORPORATE BOND

Identifiant d'entité juridique :
XJOH2VT7DMIW80J7DZ04

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ Oui	☒ ☐ Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 48.28% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.356 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.007 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.42 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.03 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants

sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	28.81%
Obligations d'entreprise	Communications	11.51%
Obligations d'entreprise	Assurance	8.88%
Obligations d'entreprise	Consommation discrétionnaire	7.73%
Obligations d'entreprise	Biens de consommation de base	7.71%
Obligations financières	Fonds communs de placement	7.49%
Obligations d'entreprise	Électricité	5.82%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.07% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐ Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.12%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 8.09%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental, visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **44.23%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.98% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL CORPORATE ESG IMPROVERS BOND

Identifiant d'entité juridique :
2138002V2U9FP8L55Z17

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des caractéristiques **environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de **61.75%**

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille.

L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante :
 - Exclusions légales sur les armes controversées
 - Entreprises qui contreviennent de façon grave et répétée à un ou plusieurs des 10 principes du Pacte mondial de l'ONU sans appliquer de mesures correctives crédibles
 - Exclusions sectorielles du groupe Amundi sur le charbon et le tabac (les détails de cette politique étant disponibles dans la Politique d'investissement responsable d'Amundi consultable sur le site Web www.amundi.fr)
2. Aucun investissement n'a été réalisé auprès d'émetteurs ayant la note F ou G. Pour tout émetteur dont la notation a été revue à la baisse et ayant reçu la note F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.
3. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'univers d'investissement du fonds après suppression de 20% des émetteurs les moins bien notés.
4. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

Le gestionnaire des investissements a concentré le processus de placement sur les entreprises/secteurs/pays ayant suivi une trajectoire positive en termes de critères ESG au sein de leur activité, ou prévoyant de suivre une telle trajectoire. Le gestionnaire des investissements a identifié des opportunités de placement alignées sur l'objectif de génération d'alpha en se concentrant en particulier sur l'inclusion des entreprises/secteurs/pays qui seront de solides gagnants en termes de critères ESG à l'avenir, qui présentent (ou présenteront) une amélioration favorable du profil ESG, tout en investissant également dans des entreprises/secteurs/pays qui sont actuellement des références en matière d'ESG.

Par ailleurs, le Compartiment a obtenu pour son portefeuille une note ESG qui est supérieure à celle de l'Indice de référence. Le Compartiment a été comparé à la note ESG de son Indice de référence après avoir exclu dudit Indice de référence 20% des titres présentant les notes ESG les plus faibles.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.616 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.007 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau

des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.77 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.03 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● **Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?**

Les principales incidences négatives correspondent aux

incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs
décrit la part des
investissements dans
des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	31.72%
Obligations d'entreprise	Biens de consommation de base	10.87%
Obligations d'entreprise	Assurance	10.16%
Obligations d'entreprise	Électricité	9.38%
Obligations d'entreprise	Consommation discrétionnaire	8.31%
Obligations d'entreprise	Technologie	6.31%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.75% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la taxinomie de l'UE¹ ?

☐ Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
- et des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.77%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Où se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 9.87%.

● Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **55.34%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.66% à la fin de la période.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS NET
ZERO AMBITION GLOBAL CORPORATE BOND

Identifiant d'entité juridique :
213800ZDJ7583Z2H5G06

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ ☐ Oui	☒ ☐ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 66.22% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille.

L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante :
 - Exclusions légales sur les armes controversées
 - entreprises qui contreviennent de façon grave et répétée à un ou plusieurs des 10 principes du Pacte mondial de l'ONU sans appliquer de mesures correctives crédibles ; et
 - exclusions sectorielles du groupe Amundi sur le charbon et le tabac (les détails de cette politique étant disponibles dans la Politique d'investissement responsable d'Amundi consultable sur le site Web www.amundi.fr).
2. Aucun investissement n'a été réalisé auprès d'émetteurs ayant la note F ou G. Pour tout émetteur dont la notation a été revue à la baisse et ayant reçu la note F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.
3. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'univers d'investissement du fonds après suppression de 20% des émetteurs les moins bien notés.
4. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales en cherchant à réduire son intensité carbone à travers l'alignement de l'intensité de l'empreinte carbone sur celle de son Indice de référence **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX**.

● *Quelle performance ont affiché les indicateurs de durabilité ?*

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est 0.537 (C).
- La note ESG moyenne pondérée de l'univers d'investissement ESG est 0.172 (D).

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

L'indicateur de durabilité utilisé est l'intensité de l'empreinte carbone du portefeuille, qui est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice de référence. Par conséquent, les titres présentant une empreinte environnementale relativement faible avaient une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 82.17
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 99.19

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.52 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.18 (D). À la fin de la période précédente, l'intensité carbone moyenne pondérée du portefeuille était de 120.64 et l'intensité carbone moyenne pondérée de l'indice de référence était de 129.04.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
BAC VAR 10/32	Obligations d'entreprise	Banques	États-Unis	1.57%
JPM VAR 05/30	Obligations d'entreprise	Banques	États-Unis	1.46%
AIB VAR 04/28 EMTN	Obligations d'entreprise	Banques	Irlande	1.27%
C VAR 05/33	Obligations d'entreprise	Banques	États-Unis	1.27%
AT&T 3.5% 09/53	Obligations d'entreprise	Communications	États-Unis	1.24%
VZ 2.355% 03/32	Obligations d'entreprise	Communications	États-Unis	1.21%
BNP VAR 07/28 EMTN	Obligations d'entreprise	Banques	France	1.14%

STANLN VAR 01/29 REGS	Obligations d'entreprise	Banques	Royaume-Uni	1.03%

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
<i>Obligations d'entreprise</i>	<i>Banques</i>	34.13%
<i>Obligations d'entreprise</i>	<i>Biens de consommation de base</i>	14.70%
<i>Obligations d'entreprise</i>	<i>Communications</i>	12.11%
<i>Obligations d'entreprise</i>	<i>Technologie</i>	7.10%
<i>Obligations d'entreprise</i>	<i>Électricité</i>	6.47%
<i>Obligations d'entreprise</i>	<i>Biens d'équipement</i>	5.63%
<i>Obligations d'entreprise</i>	<i>Assurance</i>	5.55%
<i>Obligations d'entreprise</i>	<i>Consommation discrétionnaire</i>	5.46%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.63% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.04% et la part d'investissements dans les activités habilitantes était de 0.73%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 6.65%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **61.00%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 4.58% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice Solactive Paris Aligned Global Corporate USD Hedged Index¹¹. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 82.17
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 99.19.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Un indice de marché large n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

● **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

- La note ESG moyenne pondérée du portefeuille est 0.537 (C).
- La note ESG moyenne pondérée de l'univers d'investissement ESG est 0.172 (D).
- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 82.17
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 99.19

● **Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?**

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice Solactive Paris Aligned Global Corporate USD Hedged Index¹¹. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 82.17
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 99.19

● **Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?**

Un indice de marché large n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL HIGH YIELD BOND

Identifiant d'entité juridique :
222100AIHPWCQOF6UQ48

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ Oui	☒ Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 15.45% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA GLOBAL HIGH YIELD INDEX HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.090 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.303 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.10 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.29 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés

comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
A-F GL HI YI ESG IMPR BD Z USD	Obligations financières	Fonds communs de placement	Luxembourg	3.78%

Quelle était la proportion d'investissements liés à la durabilité ?

- **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Consommation discrétionnaire	17.70%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.00% dans des investissements durables alignés sur la Taxinomie de l'UE.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Où se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 1.23%.

● Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **8.58%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 6.87% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL SHORT TERM BOND

Identifiant d'entité juridique :
213800N25O8X71IK7M94

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ ☐ Oui	☒ ☐ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 31.43% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **10% ICE BOFA GLOBAL HIGH YIELD INDEX + 80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.853 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.487 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent

plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est

ensuite enrichie d’une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d’un examen périodique de son évolution. Cette approche s’applique à tous les fonds d’Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d’informations en matière de finance durable d’Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d’investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
US TSY 1.125% 02/28	Valeurs du Trésor	Valeurs du Trésor	États-Unis	3.88%
NZGB 0.5% 05/26 0526	Valeurs du Trésor	Valeurs du Trésor	Nouvelle-Zélande	3.85%
US TSY 0.625% 11/27	Valeurs du Trésor	Valeurs du Trésor	États-Unis	3.83%
SPAIN 2.75% 10/24	Valeurs du Trésor	Valeurs du Trésor	Espagne	2.84%
BTPS 1.45% 11/24	Valeurs du Trésor	Valeurs du Trésor	Italie	2.78%

NAB 4.787% 01/29	Obligations d’entreprise	Banques	Australie	1.33%

Quelle était la proportion d’investissements liés à la durabilité ?

Quelle était l’allocation d’actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	31.32%
Obligations d'entreprise	Banques	23.44%
Obligations d'entreprise	Assurance	7.56%
Titres parapublics	Autorités locales	6.04%
Obligations d'entreprise	Consommation discrétionnaire	5.55%
Obligations d'entreprise	Électricité	5.29%
Titres parapublics	Titres souverains	3.18%

Titres parapublics	Agences	2.45%
Créances titrisées	Créances hypothécaires	2.20%
Obligations d'entreprise	Sociétés de courtage	2.04%
Obligations d'entreprise	Énergie	1.99%
Titres parapublics	Titres supranationaux	1.17%
Obligations d'entreprise	Gaz naturel	1.03%
Obligations d'entreprise	Communications	1.03%
Obligations d'entreprise	Transport	0.95%
Forex	Forex	0.54%
Obligations d'entreprise	Immobilier (REIT)	0.38%
Autres	Autres	0.06%
Liquidités	Liquidités	3.78%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.23% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

- ☐ Oui :
- ☐ Dans le gaz fossile ☐ Dans l'énergie nucléaire
- ☒ Non

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.07% et la part d'investissements dans les activités habilitantes était de 0.11%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

C'est le premier rapport périodique SFDR produit pour ce compartiment.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental, visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **25.46%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.74% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise

les caractéristiques environnementales et/ou sociales qu'il promeut.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
OPTIMAL YIELD

Identifiant d'entité juridique :
549300SEXJO4VZFPO521

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ ☐ **Oui** ☒ ☐ ☒ **Non**

☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ Il a réalisé des investissements durables ayant un objectif social : _____	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 32.75% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social ☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDICE AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.232 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.09 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de

l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les

émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AIF - EMG MKT SOVEREIGN BD - H	Obligations financières	Fonds communs de placement	Luxembourg	6.04%
UPCB 3.875% 06/29	Obligations d'entreprise	Communications	Pays-Bas	2.42%
NRW 1.75% 07/68	Titres parapublics	Autorités locales	Allemagne	1.99%
EDF VAR PERP(5%)	Obligations d'entreprise	Électricité	France	1.93%
SHAEFF 3.75% 09/26 REGS	Obligations d'entreprise	Consommation discrétionnaire	Allemagne	1.56%
OTPHB VAR 07/29	Obligations d'entreprise	Banques	Hongrie	1.18%

Quelle était la proportion d'investissements liés à la durabilité ?

- Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.23% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la taxinomie de l'UE¹ ?

☐ Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.11% et la part d'investissements dans les activités habilitantes était de 0.09%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Où se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 2.62%.

● Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 25.94% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 6.59% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
OPTIMAL YIELD SHORT TERM

Identifiant d'entité juridique :
549300NI6I5JE79M9X21

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de **31.48%**

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDICE AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.221 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.17 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de

l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les

émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Communications	15.94%
Obligations d'entreprise	Banques	12.82%
Obligations d'entreprise	Biens d'équipement	10.56%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.11% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐ Oui :

☐ Dans le gaz fossile ☐ Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.14% et la part d'investissements dans les activités habilitantes était de 0.24%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 4.86%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 22.25% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 9.12% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
STRATEGIC INCOME

Identifiant d'entité juridique :
5493004ZTK6D21CGCO05

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ ☐ **Oui** ☒ ☐ ☒ **Non**

☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ Il a réalisé des investissements durables ayant un objectif social : _____	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 18.38% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social ☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG US UNIVERSAL**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.461 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.356 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.53 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.38 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de

l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les

émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TBIP USA 02/07/24	Valeurs du Trésor	Valeurs du Trésor	États-Unis	4.91%

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

<i>Secteur</i>	<i>Sous-secteur</i>	<i>% des actifs</i>
<i>Créances titrisées</i>	<i>Titres MBS émis par des agences</i>	25.69%

Matériaux	Chimie	0.00%
Énergie	Pétrole, gaz et combustibles	0.00%
Consommation discrétionnaire	Biens de consommation durables et habillement	0.00%
Liquidités	Liquidités	-7.76%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.00% dans des investissements durables alignés sur la Taxinomie de l'UE.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐ Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 0.38%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte**

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **16.76%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 1.62% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS NET
ZERO AMBITION US CORPORATE BOND

Identifiant d'entité juridique :
213800VWP1P2KAFPEU55

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ ☐ Oui	☒ ☐ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 36.28% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds.

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales en cherchant à réduire son intensité carbone à travers l'alignement de l'intensité de l'empreinte carbone sur celle de son Indice de référence **MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND**.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● ***Quelle performance ont affiché les indicateurs de durabilité ?***

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.188 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.097 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

L'indicateur de durabilité utilisé est l'intensité de l'empreinte carbone du portefeuille, qui est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice de référence. Par conséquent, les titres présentant une empreinte environnementale relativement faible avaient une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **42.30**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **77.40**

● ***... et par rapport aux périodes antérieures ?***

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de **0.29 (D)** et la note ESG moyenne pondérée de l'univers d'investissement ESG était de **-0.07 (D)**. À la fin de la période précédente, l'intensité carbone moyenne pondérée du portefeuille était de **67.04** et l'intensité carbone moyenne pondérée de l'indice de référence était de **90.46**.

● ***Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?***

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TBIP USA 16/07/24	Valeurs du Trésor	Valeurs du Trésor	États-Unis	3.81%
CCDJ 5.7% 03/28 144A	Obligations d'entreprise	Banques	Canada	1.96%
UTX 3.125% 05/27	Obligations d'entreprise	Biens d'équipement	États-Unis	1.86%
LLOYDS VAR 03/28	Obligations d'entreprise	Banques	Royaume-Uni	1.85%
WFC VAR 07/33 MTN	Obligations d'entreprise	Banques	États-Unis	1.81%
TMUS 5.65% 01/53	Obligations d'entreprise	Communications	États-Unis	1.73%

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	33.44%
Obligations d'entreprise	Biens d'équipement	10.97%
Obligations d'entreprise	Assurance	10.22%
Obligations d'entreprise	Biens de consommation de base	9.39%
Obligations d'entreprise	Consommation discrétionnaire	6.89%

Valeurs du Trésor	Valeurs du Trésor	6.42%
Obligations d'entreprise	Technologie	5.53%
Obligations d'entreprise	Sociétés de courtage	3.85%
Obligations d'entreprise	Communications	3.06%
Obligations d'entreprise	Énergie	2.09%
Obligations d'entreprise	Sociétés financières	1.79%
Obligations d'entreprise	Immobilier (REIT)	1.79%
Obligations d'entreprise	Transport	1.64%
Obligations d'entreprise	Industries de base	0.80%
Obligations d'entreprise	Électricité	0.32%
Liquidités	Liquidités	1.60%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.00% dans des investissements durables alignés sur la Taxinomie de l'UE.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.10%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 0.00%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **29.70%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 6.57% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI USD IG Climate Paris Aligned Corp Bond. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **42.30**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **77.40**

● ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Un indice de marché large n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

● ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.188 (D)**.
 - La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.097 (D)**.
- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **42.30**
 - L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **77.40**

● ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI USD IG Climate Paris Aligned Corp Bond. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **42.30**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **77.40**

● ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Un indice de marché large n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales. L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS US
BOND

Identifiant d'entité juridique :
5493005LBJJ6BWRENA39

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de **14.90%**

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG US AGGREGATE**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.511 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.464 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.60 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.49 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de

l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les

émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
US TSY 3.125% 05/48	Valeurs du Trésor	Valeurs du Trésor	États-Unis	6.79%

Quelle était la proportion d'investissements liés à la durabilité ?

- **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	29.44%
Créances titrisées	Titres MBS émis par des agences	27.71%
Obligations d'entreprise	Banques	13.71%
Créances titrisées	Titres ABS	4.50%
Autres	Autres	3.84%
Obligations d'entreprise	Consommation discrétionnaire	3.60%
Créances titrisées	Titres CMBS non émis par des agences	3.05%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.00% dans des investissements durables alignés sur la Taxinomie de l'UE.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.02%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 0.14%.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **13.60%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 1.30% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
US CORPORATE BOND

Identifiant d'entité juridique :
222100LE431F865A4S54

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ ☐ **Oui** ☒ ☐ ☒ **Non**

☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ Il a réalisé des investissements durables ayant un objectif social : _____	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 30.82% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social ☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG US CORPORATE INVESTMENT GRADE**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille.

L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante :
 - Exclusions légales sur les armes controversées
 - Entreprises qui contreviennent de façon grave et répétée à un ou plusieurs des 10 principes du Pacte mondial de l'ONU sans appliquer de mesures correctives crédibles
 - Exclusions sectorielles du groupe Amundi sur le charbon et le tabac (les détails de cette politique étant disponibles dans la Politique d'investissement responsable d'Amundi consultable sur le site Web www.amundi.fr)
2. Aucun investissement n'a été réalisé auprès d'émetteurs ayant la note F ou G. Pour tout émetteur dont la notation a été revue à la baisse et ayant reçu la note F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.
3. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'univers d'investissement du fonds après suppression de 20% des émetteurs les moins bien notés.
4. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● *Quelle a été la performance des indicateurs de durabilité ?*

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.122 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.307 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.17 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.24 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● **Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?**

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits

humains et à la lutte contre la corruption et les actes de corruption.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- **Exclusion** : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- **Intégration des facteurs ESG** : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- **Engagement** : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- **Vote** : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- **Surveillance des controverses** : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.00% dans des investissements durables alignés sur la Taxinomie de l'UE.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la taxinomie de l'UE¹ ?**

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.07%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 0.30%.

● Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **27.04%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière

d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.79% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
US SHORT TERM BOND

Identifiant d'entité juridique :
549300QBCEQZSOFGDW23

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ Oui	☒ Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 18.24% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA 0-1 YEAR US CORPORATE INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● *Quelle performance ont affiché les indicateurs de durabilité ?*

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.386 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.215 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● *... et par rapport aux périodes antérieures ?*

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.29 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.00 (D).

● *Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?*

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent

plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d’informations en matière de finance durable d’Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

la liste inclut les investissements qui constituent la proportion la plus importante d’investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
IBRD FRN 08/24 GDIF	Titres parapublics	Titres supranationaux		3.91%

Quelle était la proportion d’investissements liés à la durabilité ?

Quelle était l’allocation d’actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	24.60%
Autres	Autres	12.85%
Créances titrisées	Titres ABS	9.29%
Valeurs du Trésor	Valeurs du Trésor	7.21%
Obligations d'entreprise	Consommation discrétionnaire	5.32%
Titres parapublics	Titres supranationaux	4.90%

<i>Obligations d'entreprise</i>	<i>Assurance</i>	4.69%
<i>Obligations d'entreprise</i>	<i>Électricité</i>	4.67%
<i>Créances titrisées</i>	<i>Créances hypothécaires immobilières</i>	4.08%
<i>Créances titrisées</i>	<i>Titres CMBS non émis par des agences</i>	3.97%
<i>Obligations d'entreprise</i>	<i>Énergie</i>	3.01%
<i>Obligations d'entreprise</i>	<i>Technologie</i>	2.69%
<i>Créances titrisées</i>	<i>Titres MBS émis par des agences</i>	2.40%
<i>Obligations d'entreprise</i>	<i>Transport</i>	1.70%
<i>Obligations d'entreprise</i>	<i>Biens d'équipement</i>	1.57%
<i>Obligations d'entreprise</i>	<i>Biens de consommation de base</i>	1.45%
<i>Obligations d'entreprise</i>	<i>Industries de base</i>	1.12%
<i>Obligations d'entreprise</i>	<i>Sociétés financières</i>	0.78%
<i>Obligations d'entreprise</i>	<i>BROKERAGE</i>	0.70%
<i>Obligations financières</i>	<i>Assurance</i>	0.46%

<i>Forex</i>	<i>Forex</i>	0.00%
<i>Liquidités</i>	<i>Liquidités</i>	1.71%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.00% dans des investissements durables alignés sur la Taxinomie de l'UE.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie

sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 0.70%.

sont des

investissements durables ayant un objectif environnemental qui ne tiennent pas compte

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 15.46% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 2.78% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice du marché général ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS ASIA
INCOME ESG BOND

Identifiant d'entité juridique :
213800UVZ2BRX4N1ZK70

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ ☐	Oui	☒ ☐ ☐	X Non
☐	Il a réalisé des investissements durables ayant un objectif environnemental : _____	☒	Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 36.66%
☐	dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☐	ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
☐	dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒	ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
☐	Il a réalisé des investissements durables ayant un objectif social : _____	☐	ayant un objectif social
☐		☐	Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **90% JP MORGAN ASIAN CREDIT INDEX (JACI) + 10% MARKIT IBOXX ASIAN LOCAL BOND INDEX (ALBI) (EX HSBC HSLI)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

En juin 2024, le fonds a publié quatre indicateurs relatifs aux incidences du portefeuille pour évaluer sa qualité ESG. Eu égard à ces quatre indicateurs couvrant des facteurs environnementaux (empreinte carbone), sociaux (gestion de la chaîne d'approvisionnement, implication de la communauté et droits de l'homme) et de gouvernance (stratégie d'entreprise ESG), le portefeuille a surperformé l'univers d'investissement avec un taux de couverture de titres en portefeuille évaluables, de 90%.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.319 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.280 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son

secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	% des actifs	Pays
IFC 6.3% 11/24	Titres parapublics	Titres supranationaux		3.66%

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Consommation discrétionnaire	19.47%
Obligations d'entreprise	Banques	14.16%
Titres parapublics	Titres supranationaux	10.92%
Valeurs du Trésor	Valeurs du Trésor	8.70%

------------	------------	-------

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.05% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

C'est le premier rapport périodique SFDR produit pour ce compartiment.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 27.10% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 9.51% à la fin de la période.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS BLENDED BOND

Identifiant d'entité juridique :
222100ABBJBM1BE8222

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des caractéristiques **environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de **16.62%**

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.110 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.153 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.03 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.16 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent

plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des

analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

la liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
A-F EMERGING MKT CORP BD - Z-USD	Obligations financières	Fonds communs de placement	Luxembourg	2.75%
PEMEX 7.19% 09/24 REGS	Obligations d'entreprise	Énergie	Mexique	1.83%

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

<i>Secteur</i>	<i>Sous-secteur</i>	<i>% des actifs</i>
<i>Titres parapublics</i>	<i>Titres souverains</i>	45.16%
<i>Valeurs du Trésor</i>	<i>Valeurs du Trésor</i>	10.94%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.02% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 1.86%.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **14.86%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 1.74% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le

produit financier
réalise les
caractéristiques
environnementales
et/ou sociales qu'il
promeut.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS BOND

Identifiant d'entité juridique :
549300KZW6KQ7WLJO866

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ ☐ Oui	☒ ☐ ☒ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 13.47% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **50% JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE + 50% JP MORGAN CEMBI BROAD DIVERSIFIED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.018 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.155 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.11 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.17 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent

plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est

ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

la liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.01% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie

sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.03%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 1.36%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 12.39% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 1.06% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice du marché général ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS CORPORATE BOND

Identifiant d'entité juridique :
529900YJOJ3E3FRQQ325

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ ☐ Oui	☒ ☐ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 35.38% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN CEMBI BROAD DIVERSIFIED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.003 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.157 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.11 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.17 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative

du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est

ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

la liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	20.51%
Obligations financières	Énergie	15.96%
Obligations financières	Consommation discrétionnaire	9.45%
Obligations financières	Industries de base	8.73%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.04% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 2.67%.

● sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

● Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 29.25% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 6.09% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS GREEN BOND

Identifiant d'entité juridique :
2138001AOC3QUTY9SA42

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de **71.39%**

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN GREEN BOND EM CREDIT DIVERSIFIED COMPOSITE HEDGED INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Le compartiment a maintenu la part prévue de son allocation investie dans l'utilisation d'obligations vertes.

L'objectif des obligations vertes consiste à financer les projets qui génèrent un impact sur l'environnement positif et quantifiable. L'indicateur clé mesurant l'impact des obligations vertes est le nombre de « Tonnes d'émissions de CO2 évitées par million d'euros investis en un an ». Au-delà de l'analyse financière quantitative et qualitative des obligations susceptibles de composer le portefeuille, le processus de sélection inclut une évaluation de la stratégie ESG au niveau de l'émetteur et une évaluation des obligations vertes suivant plusieurs points d'analyse :

1. Amundi a mis au point un système de notation ESG exclusif reposant sur une échelle de 7 lettres allant de A à G, où A correspond à la meilleure notation et G à la moins bonne notation. Tout émetteur assorti de la note G est exclu de tous les portefeuilles d'Amundi faisant l'objet d'une gestion active. Nous vérifions la notation ESG de l'émetteur et surveillons la conformité de la notation aux critères associés du fonds. Comme indiqué ci-dessus, les émetteurs ayant reçu la note G selon l'échelle de notation ESG d'Amundi ne sont pas éligibles à l'investissement. S'il existe des points faibles, l'équipe ESG Research effectuera une recherche de controverse plus détaillée concernant le pilier associé (E, S ou G).
2. L'évaluation des obligations vertes selon les critères suivants : (i) analyse du projet, via l'analyse de l'emplacement géographique des actifs, action sur les actifs, évaluation de tout impact supplémentaire du projet vert sur l'environnement, la biodiversité, les communautés locales ou autres aspects sociaux (principe consistant à « ne pas causer de préjudice important »), alignement sur les normes du secteur (par ex. alignement sur les principes des obligations vertes de l'International Capital Markets Association, l'initiative pour les obligations climat Climate Bond Initiative, la taxinomie de l'UE) ; (ii) analyse de l'émetteur aux niveaux de la stratégie ESG globale et de la controverse ; (iii) logique du financement vert (type de projets financés, allocation d'actifs verts, type d'instruments finançant les projets verts) ; et (iv) transparence (rapport sur les obligations vertes, existence d'évaluation par seconde partie)
3. La surveillance continue (investissement ex post), qui inclut la révision régulière de l'allocation, un rapport d'impact des obligations vertes, les controverses dans lesquelles l'émetteur est impliqué et la stratégie environnementale de l'émetteur.

Enfin, toutes les obligations vertes sélectionnées doivent respecter les critères et recommandations des principes des obligations vertes telles que publiées par l'International Capital Market Association. Veuillez consulter la Politique d'investissement responsable d'Amundi pour plus de renseignements sur ce qui précède.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● *Quelle performance ont affiché les indicateurs de durabilité ?*

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.130 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.006 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.

- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

À la fin de la période, le portefeuille détient **89.04%** d'obligations vertes

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.12 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.17 (D).

À la fin de la période précédente, le portefeuille détenait 85.42% d'obligations vertes

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● **Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?**

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales,

sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les

investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et,

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.25% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie

sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 37.21%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **71.13%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

des critères en matière d'activités économiques durables sur le plan environnemental, visés par le Règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 0.00% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS CORPORATE HIGH
YIELD BOND

Identifiant d'entité juridique :
5493006QGDCTMW9Y1N50

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ Oui	☒ ☐ Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 22.64% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● *Quelle performance ont affiché les indicateurs de durabilité ?*

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.038 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.133 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● *... et par rapport aux périodes antérieures ?*

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.04 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.18 (D).

● *Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?*

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs

importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- **Exclusion :** Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- **Intégration des facteurs ESG :** Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- **Engagement :** L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- **Vote :** La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

la liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	17.89%
Obligations d'entreprise	Énergie	13.94%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.00% dans des investissements durables alignés sur la Taxinomie de l'UE.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 1.45%.

 sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

● Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **19.76%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 2.87% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS HARD CURRENCY
BOND

Identifiant d'entité juridique :
549300CF4H3SXCNRP626

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de **15.82%**

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.119 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.153 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.07 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.16 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent

plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est

ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

- **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.02% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

à faible teneur en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
- et des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐ Oui :

☐ Dans le gaz fossile ☐ Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 1.60%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental, visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **14.79%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 1.01% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS LOCAL CURRENCY
BOND

Identifiant d'entité juridique :
549300JJ3276S8R63L30

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ **Oui** ☒ ☐ **X Non**

☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ Il a réalisé des investissements durables ayant un objectif social : _____	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 7.90% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social ☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables
---	--

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **80% JP MORGAN GBI EM GLOBAL DIVERSIFIED COMPOSITE + 20% ICE BOFA BROAD LOCAL EMERGING MARKETS NON-SOVEREIGN INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● *Quelle performance ont affiché les indicateurs de durabilité ?*

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.328 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.186 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● *... et par rapport aux périodes antérieures ?*

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.30 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.17 (D).

● *Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?*

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être

considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- **Exclusion :** Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- **Intégration des facteurs ESG :** Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- **Engagement :** L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- **Vote** : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- **Surveillance des controverses** : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

la liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

- **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	78.94%

Autres	Autres	-0.05%
Liquidités	Liquidités	4.08%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.00% dans des investissements durables alignés sur la Taxinomie de l'UE.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires des investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 0.30%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 5.73% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 2.17% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS SHORT TERM
BOND

Identifiant d'entité juridique :
5493000K4D8P0NQAIA67

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ Oui	☒ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 23.00% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **75% JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD + 25% JP MORGAN EMBI GLOBAL DIVERSIFIED 1-3 Y INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.019 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.201 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.06 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.21 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés

comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des

analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AIF - EMG MKT SOVEREIGN BD - S	Obligations financières	Fonds communs de placement	Luxembourg	4.66%
OTPHB VAR 05/33 EMTN	Obligations d'entreprise	Banques	Hongrie	1.65%

Quelle était la proportion d'investissements liés à la durabilité ?

- Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	24.30%
Obligations d'entreprise	Industries de base	9.74%
Obligations d'entreprise	Énergie	9.28%
Obligations d'entreprise	Obligations financières - autres	8.20%
Obligations d'entreprise	Électricité	5.82%
Obligations d'entreprise	Transport	5.69%
Obligations d'entreprise	Communications	5.50%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.08% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐ Oui :

☐ Dans le gaz fossile ☐ Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.07% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 3.40%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **20.04%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 2.88% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS ASIA
MULTI ASSET TARGET INCOME

Identifiant d'entité juridique :
213800D8TH8Y8YWFBV59

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ Oui	☒ ☐ Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 27.54% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **30% JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE + 50% MSCI EM (EMERGING MARKETS) + 20% JP MORGAN CEMBI BROAD DIVERSIFIED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.150 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.126 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés

comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est

ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
ISHSIV-MSCI INDIA UCITS ETF(LSE)	Obligations financières	Fonds communs de placement	Irlande	4.89%
Amundi MSCI China A II ETF	Obligations financières	Fonds communs de placement	Luxembourg	2.85%
TAIWAN SEMICONDUCTOR MANUFAC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Taïwan	2.77%
TENCENT HOLDINGS LTD	Services de communication	Médias et loisirs	Îles Caïmans	1.32%
SAMSUNG ELECTRONICS	Technologies de l'information	Matériel et équipement technologiques	Corée	1.20%
LENOVO 3.421% 11/30 REGS	Obligations d'entreprise	Technologie	Hong Kong	1.00%

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations financières	Fonds communs de placement	8.92%

<i>Liquidités</i>	<i>Liquidités</i>	<i>16.68%</i>

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.01% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐ Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **18.85%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 8.69% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilité entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EURO
MULTI-ASSET TARGET INCOME

Identifiant d'entité juridique :
549300MRV3FILX0BHB52

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de **31.23%**

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● *Quelle performance ont affiché les indicateurs de durabilité ?*

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.674 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● *... et par rapport aux périodes antérieures ?*

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.73 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.00 (D).

● *Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?*

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de

l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d’informations en matière de finance durable d’Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d’investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMND GOLD LBMA ETC(PAR)	Obligations financières	Fonds communs de placement	Irlande	3.52%

Quelle était la proportion d’investissements liés à la durabilité ?

● Quelle était l’allocation d’actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	20.42%
Obligations financières	Fonds communs de placement	13.36%
Obligations d'entreprise	Banques	7.09%
Titres parapublics	Titres souverains	6.35%
Obligations d'entreprise	Consommation discrétionnaire	4.56%
Obligations d'entreprise	Électricité	3.06%
Obligations d'entreprise	Communications	2.90%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.62% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
- et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐ Oui :

☐ Dans le gaz fossile ☐ Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.02% et la part d'investissements dans les activités habilitantes était de 0.51%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 4.92%.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **24.55%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 6.06% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL MULTI-ASSET

Identifiant d'entité juridique :
549300OD7WDES3BYBD54

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐	Oui	☒ ☐	X Non
--	------------	--	--------------

☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 34.23%
☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDICE AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.313 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.49 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de

l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMND GOLD LBMA ETC(PAR)	Obligations financières	Fonds communs de placement	Irlande	4.23%
US TSY 2.875% 08/28	Valeurs du Trésor	Valeurs du Trésor	États-Unis	2.50%
APPLE INC	Technologies de l'information	Matériel et équipement technologiques	États-Unis	1.58%
BTPS 2.25% 01/09/36	Valeurs du Trésor	Valeurs du Trésor	Italie	1.33%
ALPHABET INC CL C	Services de communication	Médias et loisirs	États-Unis	1.32%
MICROSOFT CORP	Technologies de l'information	Logiciels et services	États-Unis	1.24%
SPAIN 5.75% 07/32	Valeurs du Trésor	Valeurs du Trésor	Espagne	1.24%
AFS - ICAV GLOBAL MULTI Z2 USD	Obligations financières	Fonds communs de placement	Irlande	1.10%
AMAZON.COM INC	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	États-Unis	1.03%

A F ASIA MULTI ASSET TGT INC	Obligations financières	Fonds communs de placement	Luxembourg	0.95%
KRAFT HEINZ CO/THE	Biens de consommation de base	Alimentation, boissons et tabac	États-Unis	0.84%
CISCO SYSTEMS INC	Technologies de l'information	Matériel et équipement technologiques	États-Unis	0.82%
BTPS 4.15% 10/39 15Y	Valeurs du Trésor	Valeurs du Trésor	Italie	0.82%
AMERICAN TOWER CL A	Immobilier	Sociétés d'investissement immobilier	États-Unis	0.79%

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	14.22%
Obligations d'entreprise	Banques	9.16%
Obligations financières	Fonds communs de placement	9.12%
Technologies de l'information	Matériel et équipement technologiques	5.18%
Santé	Pharmacie, biotechnologie et sciences de la vie	4.43%
Obligations financières	Banques	4.34%

<i>Industrie</i>	<i>Biens d'équipement</i>	4.22%
<i>Technologies de l'information</i>	<i>Semi-conducteurs et équipement pour semi-conducteurs</i>	3.02%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie**

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.37% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐ Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.42%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 2.28%.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental, visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **29.06%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.70% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● **En quoi l'indice de référence diffère-t-il de l'indice de marché large ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit

financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL MULTI-ASSET CONSERVATIVE

Identifiant d'entité juridique :
549300B1R0N20X3Z5K83

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐	☒ ☐
Oui	Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 31.75% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDICE AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.633 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.62 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.00 (C).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés

comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d’informations en matière de finance durable d’Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d’investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
SPAIN 5.75% 07/32	Valeurs du Trésor	Valeurs du Trésor	Espagne	4.96%

Quelle était la proportion d’investissements liés à la durabilité ?

- Quelle était l’allocation d’actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.37% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.43%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 2.89%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 27.26% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 4.12% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL MULTI-ASSET TARGET INCOME

Identifiant d'entité juridique :
549300MJSB1OV3IZ3T98

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☒ ☐ Oui	☒ ☐ ☒ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de <u>30.64%</u> ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDICE AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.506 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.52 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.00 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants

sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.46% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.40%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 3.28%.

● sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental, visés par le Règlement (UE) 2020/852.

● Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **23.79%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 6.38% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
NET ZERO AMBITION MULTI-ASSET

Identifiant d'entité juridique :
549300UWEKCHQNE88693

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ ☐ Oui	☒ ☐ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 60.28% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **50% MSCI ACWI + 5% MSCI USD HY CORPORATE BOND INDEX + 15% MSCI USD IG CORPORATE BOND + 5% MSCI EUR HY CORPORATE BOND INDEX + 25% MSCI EUR IG CORPORATE BOND INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille.

L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante :
 - Exclusions légales sur les armes controversées
 - entreprises qui contreviennent de façon grave et répétée à un ou plusieurs des 10 principes du Pacte mondial de l'ONU sans appliquer de mesures correctives crédibles ; et
 - exclusions sectorielles du groupe Amundi sur le charbon et le tabac (les détails de cette politique étant disponibles dans la Politique d'investissement responsable d'Amundi consultable sur le site Web www.amundi.fr).
2. Aucun investissement n'a été réalisé auprès d'émetteurs ayant la note F ou G. Pour tout émetteur dont la notation a été revue à la baisse et ayant reçu la note F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.
3. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'univers d'investissement du fonds après suppression de 20% des émetteurs les moins bien notés.
4. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales en cherchant à réduire son intensité carbone à travers l'alignement de l'intensité de l'empreinte carbone sur celle de son Indice de référence **50% MSCI ACWI Climate Change Index + 15% MSCI USD IG Climate Change Corporate Bond Index + 25% MSCI EUR IG Climate Change Corporate Bond Index + 5% MSCI USD HY Climate Change Corporate Bond Index + 5% MSCI EUR HY Climate Change Corporate Bond Index**.

● *Quelle performance ont affiché les indicateurs de durabilité ?*

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est 0.519 (C).
- La note ESG moyenne pondérée de l'univers d'investissement ESG est -0.012 (D).

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

L'indicateur de durabilité utilisé est l'intensité de l'empreinte carbone du portefeuille, qui est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice de référence. Par conséquent, les titres présentant une empreinte environnementale relativement faible avaient une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 93.73

- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 110.21

● ... et par rapport aux périodes antérieures ?

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.46 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.04 (D). À la fin de la période précédente, l'intensité carbone moyenne pondérée du portefeuille était de 122.08 et l'intensité carbone moyenne pondérée de l'indice de référence était de 127.65 ¹.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

¹ Au cours de 2023, l'indice de référence a été remplacé par l'indice 50% MSCI ACWI Climate Change Index + 15% MSCI USD IG Climate Change Corporate Bond Index + 25% MSCI EUR IG Climate Change Corporate Bond Index + 5% MSCI USD HY Climate Change Corporate Bond Index + 5% MSCI EUR HY Climate Change Corporate Bond Index et nous avons également publié à des fins de cohérence, l'intensité carbone de cet indice pour l'année antérieure.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les

conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
NVIDIA CORP	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	1.99%
MICROSOFT CORP	Technologies de l'information	Logiciels et services	États-Unis	1.66%
APPLE INC	Technologies de l'information	Matériel et équipement technologiques	États-Unis	1.55%
TAIWAN SEMICONDUCTOR MANUFAC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Taïwan	1.45%
OAT 1.75% 06/39	Valeurs du Trésor	Valeurs du Trésor	France	1.30%
EU 0.4% 02/37 NGEU	Titres parapublics	Titres supranationaux		1.17%
BTPS 1.5% 04/45 34Y	Valeurs du Trésor	Valeurs du Trésor	Italie	1.10%
AMUNDI PLANET II SEED SENIOR EUR HEDGED	Obligations financières	Fonds communs de placement	Luxembourg	1.08%

A-F EUROLAND EQ SMALL CAP-Z EUR	Obligations financières	Fonds communs de placement	Luxembourg	0.55%

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	13.49%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	6.15%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.68% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☒ Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☐ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.02% et la part d'investissements dans les activités habilitantes était de 0.52%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 10.80%.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **49.44%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 10.17% à la fin de la période.

● **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

● **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice composé à 50% du MSCI ACWI Climate Change Index, à 15% du MSCI USD IG Climate Change Corporate Bond Index, à 25% du MSCI EUR IG Climate Change Corporate Bond Index, à 5% du MSCI USD HY Climate Change Corporate Bond Index et à 5% du MSCI EUR HY Climate Change Corporate Bond Index. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 93.73
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 110.21

● *En quoi l'indice de référence diffère-t-il de l'indice de marché large ?*

Un indice de marché large n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence « transition climatique » qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

- La note ESG moyenne pondérée du portefeuille est 0.519 (C).
- La note ESG moyenne pondérée de l'univers d'investissement ESG est -0.012 (D).
- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 93.73
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 110.21

● *Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?*

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice composé à 50% du MSCI ACWI Climate Change Index, à 15% du MSCI USD IG Climate Change Corporate Bond Index, à 25% du MSCI EUR IG Climate Change Corporate Bond Index, à 5% du MSCI USD HY Climate Change Corporate Bond Index et à 5% du MSCI EUR HY Climate Change Corporate Bond Index. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 93.73
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 110.21

● ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Un indice de marché large n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence « transition climatique » qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI
FUNDS MULTIASSET REAL RETURN

Identifiant d'entité juridique :
222100UNVFMGHI5DQJ57

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ **Oui** ☒ ☐ **X Non**

☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ Il a réalisé des investissements durables ayant un objectif social : _____	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de <u>42.84%</u> ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social ☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDICE AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.770 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.80 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.00 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés

comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie**

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.06% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐ Oui :

☐ Dans le gaz fossile

☐ Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.05% et la part d'investissements dans les activités habilitantes était de 0.25%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 7.85%.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **37.42%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 4.36% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
MULTIASSET SUSTAINABLE FUTURE

Identifiant d'entité juridique :
549300E1QOFTUCHMCV76

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ ☐ Oui	☒ ☐ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 67.59% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **30% MSCI WORLD + 70% BLOOMBERG EURO AGGREGATE (E)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille.

L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

À la fin de la période :

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante :
 - Exclusions légales sur les armes controversées
 - entreprises qui contreviennent de façon grave et répétée à un ou plusieurs des 10 principes du Pacte mondial de l'ONU sans appliquer de mesures correctives crédibles ; et
 - exclusions sectorielles du groupe Amundi sur le charbon et le tabac (les détails de cette politique étant disponibles dans la Politique d'investissement responsable d'Amundi consultable sur le site Web www.amundi.fr).
2. Aucun investissement n'a été réalisé auprès d'émetteurs ayant la note F ou G. Pour tout émetteur dont la notation a été revue à la baisse et ayant reçu la note F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.
3. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'univers d'investissement du fonds après suppression de 20% des émetteurs les moins bien notés.
4. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● *Quelle performance ont affiché les indicateurs de durabilité ?*

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.104 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.718 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.14 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.75 (C).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● **Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?**

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
SPAIN 4.20% 01/37	Valeurs du Trésor	Valeurs du Trésor	Espagne	2.19%

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

------------	------------	-------

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.04% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie

sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.85%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 12.17%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **56.84%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 9.71% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
PIONEER FLEXIBLE OPPORTUNITIES

Identifiant d'entité juridique :
5493000SYHI3US1RDZ90

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ Oui	☒ ☐ Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 38.25% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDICE AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.509 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.43 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés

comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
US TSY 4.625% 02/25	Valeurs du Trésor	Valeurs du Trésor	États-Unis	7.10%
SWISS LIFE HOLD AG	Obligations financières	Assurance	Suisse	3.64%
ASR NEDERLAND NV	Obligations financières	Assurance	Pays-Bas	3.30%
PALO ALTO NETWORKS INC	Technologies de l'information	Logiciels et services	États-Unis	3.03%
POSTE ITALIANE SPA	Obligations financières	Assurance	Italie	2.74%
FORD MOTOR COMPANY	Consommation discrétionnaire	Automobiles et composants	États-Unis	2.65%
CRH PLC UK	Matériaux	Matériaux de construction	Irlande	2.63%
INTL BUSINESS MACHINES CORP	Technologies de l'information	Logiciels et services	États-Unis	2.53%
SUMITOMO MITSUI FINAN	Obligations financières	Banques	Japon	2.52%

IBERDROLA SA	Services aux collectivités	Services aux collectivités – électricité	Espagne	2.30%
AXA SA	Obligations financières	Assurance	France	2.30%
CURTISS-WRIGHT	Industrie	Biens d'équipement	États-Unis	2.27%
DBS GROUP HOLDINGS LTD	Obligations financières	Banques	Singapore	2.25%
ELEVANCE HEALTH INC	Santé	Matériel et services de santé	États-Unis	2.22%

Quelle était la proportion d'investissements liés à la durabilité ?

- **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.35% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.03% et la part d'investissements dans les activités habilitantes était de 0.99%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 11.07%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **27.95%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 8.96% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
INCOME OPPORTUNITIES

Identifiant d'entité juridique :
549300ILVTGROHRV6666

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ ☐ **Oui** ☒ ☐ ☐ **X** **Non**

☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ Il a réalisé des investissements durables ayant un objectif social : _____	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de <u>32.49%</u> ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social ☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables
---	--

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDICE AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.280 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.046 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent

plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.li

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
SHELL PLC	Énergie	Pétrole, gaz et combustibles	Royaume-Uni	3.20%
INTL BUSINESS MACHINES CORP	Technologies de l'information	Logiciels et services	États-Unis	2.78%
ABN AMRO BANK NV-CVA	Obligations financières	Banques	Pays-Bas	2.51%
KB FINANCIAL GROUP INC	Obligations financières	Banques	Corée	2.33%
SANOFI	Santé	Pharmacie, biotechnologie et sciences de la vie	France	1.94%
PFIZER INC	Santé	Pharmacie, biotechnologie et sciences de la vie	États-Unis	1.92%
SAMSUNG ELECTRONICS	Technologies de l'information	Matériel technologique et équipement	Corée	1.64%
FN FS6369	Créances titrisées	Titres MBS émis par des agences	États-Unis	1.56%
STATE STREET CORP	Obligations financières	Services financiers	États-Unis	1.41%
PERSIMMON PLC	Consommation discrétionnaire	Biens de consommation durables et habillement	Royaume-Uni	1.20%
EVERSOURCE ENERGY	Services aux collectivités	Services aux collectivités – électricité	États-Unis	1.12%
HENSOLDT AG	Industrie	Biens d'équipement	Allemagne	0.94%
UNICREDIT SPA	Obligations financières	Banques	Italie	0.94%
FN FS5917	Créances titrisées	Titres MBS émis par des agences	États-Unis	0.93%
LVL 10.5% 05/30 144A	Obligations d'entreprise	Communications	États-Unis	0.88%

Quelle était la proportion d'investissements liés à la durabilité ?

- **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Autres	Autres	22.35%
Créances titrisées	Titres MBS émis par des agences	16.18%
Obligations financières	Banques	8.54%
Obligations d'entreprise	Banques	6.78%
Obligations financières	Services financiers	5.42%
Énergie	Pétrole, gaz et combustibles	4.40%
Obligations financières	Assurance	4.04%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.01% dans des investissements durables alignés

énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐ Oui :

☐ Dans le gaz fossile ☐ Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.01%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 0.01%.

sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **26.46%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 6.02% à la fin de la période.

● **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

● **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS REAL ASSETS TARGET INCOME

Identifiant d'entité juridique : 549300B49TP3UV3FOI07

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ ☐ Oui ☒ ☐ ☒ Non

☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ Il a réalisé des investissements durables ayant un objectif social : _____	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 31.88% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social ☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **7.5% ICE BOFA US HIGH YIELD INDEX + 5% IBOXX EURO CORPORATE NON FINANCIALS + 5% ALERIAN MLP + 5% BLOOMBERG GOLD SUBINDEX TOTAL RETURN + 5% BLOOMBERG COMMODITY INDEX (VALO) + 15% MSCI ACWI REAL ESTATE INVESTMENT TRUSTS (REIT) + 7.5% MSCI WORLD TRANSPORTATION INFRASTRUCTURE + 10% MSCI World Index / Food Beverage & Tobacco -IG + 10% MSCI World Index / Materials -SEC + 5% ICE BOFA GLOBAL INFLATION-LINKED GOVERNMENT INDEX + 5% ICE BOFA EURO HIGH YIELD INDEX + 5% MSCI World Index / Utilities -SEC + 5% ICE BOFA US NON-FINANCIAL CORPORATE INDEX + 10% MSCI World Index / Energy -SEC**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● ***Quelle performance ont affiché les indicateurs de durabilité ?***

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.533 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.045(D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● ***... et par rapport aux périodes antérieures ?***

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.64 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.1 (D).

● ***Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?***

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être

considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et

liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMUNDI GOLD STOCK-AED	Obligations financières	Fonds communs de placement	Autriche	2.78%
US TII 3.875% 04/29	Valeurs du Trésor	Valeurs du Trésor	États-Unis	2.08%
ISHARES EPRA ASIA (GERMANY)	Obligations financières	Fonds communs de placement	Irlande	1.93%
A-F EMERGING MKT CORP BD-Z USD QD	Obligations financières	Fonds communs de placement	Luxembourg	1.81%
SIMON PROPERTY GROUP INC	Immobilier	Sociétés d'investissement immobilier	États-Unis	1.73%
AVALONBAY COMMUNITIES INC	Immobilier	Sociétés d'investissement immobilier	États-Unis	1.60%
FREEMPORT-MCMORAN INC	Matériaux	Métaux et exploitation minière	États-Unis	1.55%
TRANSURBAN GROUP	Industrie	Transport	Australie	1.41%

SCHLUMBERGER LTD	Énergie	Énergie Équipements et communication	Curaçao	1.18%

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables. La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Immobilier	Sociétés d'investissement immobilier	11.33%
Énergie	Pétrole, gaz et combustibles	8.33%
Matériaux	Métaux et exploitation minière	7.90%
Obligations financières	Fonds communs de placement	7.72%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.01% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles

à faible teneur en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐ Oui :

☐ Dans le gaz fossile

☐ Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 6.07%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental, visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **21.38%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 10.49% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
TARGET COUPON

Identifiant d'entité juridique :
2221009D0WCSI3Q32Q11

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ ☐ Oui	☒ ☐ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 57.94% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.561 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.99 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.00 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de

l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les

émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d’informations en matière de finance durable d’Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d’investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMUNDI REVENUS - OR	Obligations financières	Fonds communs de placement	France	100.09%

Quelle était la proportion d’investissements liés à la durabilité ?

Quelle était l’allocation d’actifs ?

L’allocation d’actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Fonds communs de placement	100.09%
Liquidités	Liquidités	-0.09%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.96% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
- et des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.02% et la part d'investissements dans les activités habilitantes était de 1.26%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE .

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 0.00%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 53.38% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 2.60% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS ABSOLUTE
RETURN CREDIT

Identifiant d'entité juridique :
222100C0Q8DZ0ONZYS48

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ ☐ **Oui** ☒ ☐ ☐ **X** **Non**

☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ Il a réalisé des investissements durables ayant un objectif social : _____	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de <u>37.39%</u> ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social ☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.507 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.29 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.00 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés

comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TBIP USA 20/08/24	Valeurs du Trésor	Valeurs du Trésor	États-Unis	4.29%
TBIP USA 05/09/24	Valeurs du Trésor	Valeurs du Trésor	États-Unis	3.56%
ASSDLN 8.125% 05/30 REGS	Obligations d'entreprise	Biens de consommation de base	Royaume-Uni	1.66%

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	37.13%
Obligations d'entreprise	Assurance	9.58%
Obligations d'entreprise	Consommation discrétionnaire	7.93%
Valeurs du Trésor	Valeurs du Trésor	7.85%
Obligations d'entreprise	Communications	7.66%
Obligations d'entreprise	Électricité	4.38%
Obligations d'entreprise	Biens de consommation de base	4.05%

<i>Obligations d'entreprise</i>	<i>Énergie</i>	3.27%
<i>Obligations d'entreprise</i>	<i>Transport</i>	2.26%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.02% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

à faible teneur en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐ Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 10.46%.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **33.61%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.76% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● **En quoi l'indice de référence diffère-t-il de l'indice de marché large ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les

caractéristiques
environnementales
et/ou sociales qu'il
promeut.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
ABSOLUTE RETURN MULTI-STRATEGY

Identifiant d'entité juridique :
549300G94XO1UF8XMQ66

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ Oui	☒ ☐ Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 32.62% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDICE AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● *Quelle performance ont affiché les indicateurs de durabilité ?*

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.466 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● *... et par rapport aux périodes antérieures ?*

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.58 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.00 (D).

● *Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?*

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières

et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMUNDI PHYSICAL GOLD ETC	Obligations financières	Fonds communs de placement	Irlande	3.35%

Quelle était la proportion d'investissements liés à la durabilité ?

- Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.22% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐ Oui :

☐ Dans le gaz fossile ☐ Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

aux meilleures performances réalisables.

Les activités alignées sur la taxinomie

sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.50%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 3.81%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 26.26% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 6.13% à la fin de la période.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental, visés par le Règlement (UE) 2020/852.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
ABSOLUTE RETURN GLOBAL
OPPORTUNITIES BOND

Identifiant d'entité juridique :
549300BBK38MPT8QZI59

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ Oui	☒ Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 34.92% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan social au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan social au titre de la Taxinomie de l'UE	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG GLOBAL AGGREGATE**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.876 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.699 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.94 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.00 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières

et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.22% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.06%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 10.35%.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental, visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **31.94%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 2.76% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● ***Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

● ***Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
QUANTITATIVE GLOBAL ABSOLUTE
RETURN BOND

Identifiant d'entité juridique :
213800ADK5DD5CTZQ486

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ Oui	☒ Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 18.52% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan social au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan social au titre de la Taxinomie de l'UE	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDICE AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● *Quelle performance ont affichée les indicateurs de durabilité ?*

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.067 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● *... et par rapport aux périodes antérieures ?*

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.21 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

● *Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?*

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du

secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie

d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	27.28%

Liquidités	Liquidités	10.22%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités **habilitées** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités **transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.05% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie

sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.01%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 1.47%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **16.97%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 1.50% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
MULTISTRATEGY GROWTH

Identifiant d'entité juridique :
549300U03843Z1MQX452

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ **Oui** ☒ ☐ **Non**

☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ Il a réalisé des investissements durables ayant un objectif social : _____	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 26.65% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social ☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDICE AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.386 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.54 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés

comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

la liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMUNDI PHYSICAL GOLD ETC	Obligations financières	Fonds communs de placement	Irlande	6.02%
INVESCO BLOOMBERG COMMODITY UCIT ETF(LSE)	Obligations financières	Fonds communs de placement	Irlande	5.85%
AMND STXAA5 ENR ETF(MIL)	Obligations financières	Fonds communs de placement	Luxembourg	1.92%

NOVO NORDISK A/S-B	Santé	Pharmacie, biotechnologie et sciences de la vie	Danemark	0.61%

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations financières	Fonds communs de placement	17.24%
Obligations d'entreprise	Banques	16.42%
Titres parapublics	Titres souverains	6.28%
Valeurs du Trésor	Valeurs du Trésor	3.75%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.15% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« atténuation du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.18%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 3.12%.

● sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

● Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **20.79%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.71% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de marché large ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
PROTECT 90

Identifiant d'entité juridique :
22210055YWH87PNEL252

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ Oui	☒ Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 32.67% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan social au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan social au titre de la Taxinomie de l'UE	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.648 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.71 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.00 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de

l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/2024**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

● **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Fonds communs de placement	95.52%
Obligations d'entreprise	Banques	1.49%
Obligations d'entreprise	Immobilier (REIT)	1.18%
Autres	Autres	0.13%
Forex	Forex	0.05%
Valeurs du Trésor	Valeurs du Trésor	0.00%

Liquidités	Liquidités	1.64%
------------	------------	-------

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.36% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐ Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.36%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 3.34%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 27.21% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.10% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS CASH

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
☒ ☐ Oui	☒ ☐ X Non
☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 59.52% ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social
☐ Il a réalisé des investissements durables ayant un objectif social : _____	☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.849 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.051 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.66 (C) et la note ESG moyenne pondérée de l'indice de référence était de 0.04 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés

comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2023 au 30/06/24**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
ITALY 5.125% 07/24	Titres parapublics	Agences	Italie	3.05%

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	51.74%
Valeurs du Trésor	Valeurs du Trésor	12.53%
Autres	Autres	10.39%
Titres parapublics	Agences	7.27%
Obligations d'entreprise	Biens d'équipement	5.71%
Obligations d'entreprise	Biens de consommation de base	4.57%

Obligations d'entreprise	Communications	3.14%
Obligations d'entreprise	Technologie	3.13%
Créances titrisées	Créances hypothécaires	2.31%
Obligations d'entreprise	Sociétés financières	1.75%
Obligations d'entreprise	Consommation discrétionnaire	1.16%
Obligations d'entreprise	Industries de base	1.01%
Obligations d'entreprise	Obligations financières - autres	0.31%
Liquidités	Liquidités	-4.38%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.63% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐ Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒ Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

aux meilleures performances réalisables.

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.46%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 1.21%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 57.91% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 0.97% à la fin de la période.

Les investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice du marché général ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS CASH
USD

Identifiant d'entité juridique :
529900YRTK94MJYXUO62

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

☒ ☐ **Oui** ☒ ☐ **X Non**

☐ Il a réalisé des investissements durables ayant un objectif environnemental : _____ ☐ dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ Il a réalisé des investissements durables ayant un objectif social : _____	☒ Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de <u>51.17%</u> ☐ ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☒ ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE ☐ ayant un objectif social ☐ Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.736 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.051 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.62 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.04 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire des investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les « meilleures performances » de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire des investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire des investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières

et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire des investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire des investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ;
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ;
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir :
du 01/07/2023 au 30/06/2024

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
DAT 03/07/24 BRED USD F 5.32	Autres	Autres	France	7.14%
DAT 03/07/24 BSCH USD F 5.31	Autres	Autres	Espagne	3.57%
AMUNDI MMST (USD)-OV	Obligations financières	Fonds communs de placement	Luxembourg	3.00%
RCP 23/07/24 9432JP USD F 5.64	Obligations d'entreprise	Communications	Japon	1.42%
DAT 26/08/21 BNPP USD F 0.07	Autres	Autres	France	1.19%
RCP 15/07/24 SUMI USD F 5.515	Obligations d'entreprise	Banques	Japon	1.19%
RCP 16/07/24 MTFGB USD F 5.52	Obligations d'entreprise	Banques	Japon	1.19%
CPE 16/07/24 MAGNA USD F 5.57	Obligations d'entreprise	Consommation discrétionnaire	Canada	1.19%
RCP 17/07/24 BAN USD F 5.52	Obligations d'entreprise	Banques	Corée	1.19%
CPE 23/07/24 HP INC USD F 5.48	Obligations d'entreprise	Technologie	États-Unis	1.19%
CPE 24/07/24 AVANGRID USD F 5.49	Obligations d'entreprise	Électricité	États-Unis	1.19%
CPE 31/07/24 AVANGRID USD F 5.58	Obligations d'entreprise	Électricité	États-Unis	1.18%

CPE 06/11/24 TLSCA USD F 5.46	Obligations d'entreprise	Communications	Australie	1.17%

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	51.90%
Autres	Autres	15.05%
Obligations d'entreprise	Communications	7.70%
Obligations d'entreprise	Électricité	5.13%
Obligations d'entreprise	Consommation discrétionnaire	4.07%
Obligations financières	Fonds communs de placement	3.00%

Obligations d'entreprise	Technologie	1.67%
Obligations d'entreprise	Biens de consommation de base	1.66%
Créances titrisées	Créances hypothécaires	1.17%
Obligations d'entreprise	Biens d'équipement	0.96%
Obligations d'entreprise	Gaz naturel	0.71%
Obligations d'entreprise	Assurance	0.71%
Titres parapublics	Agences	0.70%
Liquidités	Liquidités	7.96%

Aux fins d'observer la taxinomie de l'UE, les critères relatifs au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.39% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires des investissements sur les objectifs de la taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

☐

Oui :

☐

Dans le gaz fossile

☐

Dans l'énergie nucléaire

☒

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

● Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2024, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.22%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?

À la fin de la période précédente, le pourcentage d'investissements alignés sur la taxinomie était de 2.34%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **48.33%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

durables sur le plan
environnemental
visés par le
Règlement (UE)
2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 2.45% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?

Ce produit ne dispose pas d'un Indice de référence ESG.
