

Product name: AMUNDI CAC 40 ESG

Legal entity identifier:  
549300TC0PVE58KW9N64

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X No

It made sustainable investments with an environmental objective: \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 85.97% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the CAC 40 ESG Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

### How did the sustainability indicators perform?

The ISS ESG Corporate Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

The ISS ESG Corporate Rating provides relevant and forward-looking environmental, social, and governance (ESG) data and performance assessments. Rooted in a holistic understanding of 754

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

/1102 materiality, companies are assessed against a standard set of universal ESG topics as well as additional industry-specific topics. The materiality approach covers both material sustainability risks as well as adverse impacts on society and the environment. Drawing on an overall pool of more than 700 indicators, ISS ESG applies approximately 100 social, environmental, and governance-related indicators per rated entity, covering topics such as employee matters, supply chain management, business ethics, corporate governance, environmental management, eco-efficiency, and others.

More precisely, CAC 40 ESG Index (the "Index") is constructed from the CAC Large 60 Index and applies the following filters: - Companies with an active critical controversies related to UNGC as determined by ISS are not eligible for the Index. - Companies as per ISS's data involved in controversial weapons, civilian firearms, thermal coal mining, coal fuelled power generation, Tar sand and oil and tobacco are not eligible for inclusion into the Index. The eligible companies are ranked by decreasing order on the ESG score as assigned by ISS. In case of an equal score the company with the highest free float market capitalization will rank higher.

- At the end of the period, the ISS ESG Corporate Rating of the index CAC 40 ESG Index is 2.55.
- At the end of the period, the ISS ESG Corporate Rating of the parent index CAC Large 60 Index is 2.52.

● ***... and compared to previous periods?***

At the end of the previous period;

- the Moody's ESG Rating of the index CAC 40 ESG Index is 69.00.
- the Moody's ESG Rating of the parent index CAC Large 60 Index is 67.00.

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of

this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **From 01/10/2024 to 30/09/2025**

Largest Investments	Sector	Sub-Sector	Country	% Assets
SCHNEIDER ELECT SE	Industrials	Capital goods	France	8.87%
LVMH MOET HENNESSY LOUIS VUI	Consumer Discretionary	Consumer Durables & Apparel	France	7.37%
AIRBUS SE	Industrials	Capital goods	Netherlands	6.53%
SANOFI - PARIS	Health Care	Pharmaceuticals Biotech & Life Sciences	France	6.27%
AIR LIQUIDE PRIME FIDELITE	Materials	Chemicals	France	5.73%
L'OREAL PRIME FIDELITE	Consumer Staples	Household & Personal Products	France	5.62%
SAFRAN SA	Industrials	Capital goods	France	5.57%
ESSILORLUXOTTI CA	Health Care	Health Care Equipment & Services	France	5.07%
BNP PARIBAS	Financials	Banks	France	4.64%

HERMES INTERNATIONAL	Consumer Discretionary	Consumer Durables & Apparel	France	4.11%
AXA SA	Financials	Insurance	France	4.03%
DANONE	Consumer Staples	Food, Beverage & Tobacco	France	3.46%
VINCI SA (PARIS)	Industrials	Capital goods	France	3.40%
COMPAGNIE DE SAINT GOBAIN	Industrials	Capital goods	France	2.54%
LEGRAND SA	Industrials	Capital goods	France	2.23%

### What was the proportion of sustainability-related investments?

The fund invested 85.97% in sustainability-related investments.

### What was the asset allocation?

### In which economic sectors were the investments made ?

<b>Sector</b>	<b>Sub-Sector</b>	<b>% Assets</b>
<i>Industrials</i>	<i>Capital goods</i>	30.12%

<i>Consumer Discretionary</i>	<i>Consumer Durables &amp; Apparel</i>	13.42%
<i>Financials</i>	<i>Banks</i>	6.94%
<i>Health Care</i>	<i>Pharmaceuticals Biotech &amp; Life Sciences</i>	6.28%
<i>Materials</i>	<i>Chemicals</i>	5.73%
<i>Consumer Staples</i>	<i>Household &amp; Personal Products</i>	5.62%
<i>Health Care</i>	<i>Health Care Equipment &amp; Services</i>	5.07%
<i>Financials</i>	<i>Insurance</i>	4.03%
<i>Utilities</i>	<i>Multi-Utilities</i>	3.99%
<i>Consumer Staples</i>	<i>Food, Beverage &amp; Tobacco</i>	3.96%

<i>Information Technology</i>	<i>Semiconductors &amp; Semiconductor Equipment</i>	1.28%
<i>Industrials</i>	<i>Commercial &amp; Professional Services</i>	0.93%
<i>Consumer Discretionary</i>	<i>Consumer Services</i>	0.89%

<i>Financials</i>	<i>Financial Services</i>	0.48%
<i>Consumer Staples</i>	<i>Consumer Staples Distribution &amp; Retail</i>	0.20%
<i>Others</i>	<i>Others</i>	0.00%
<i>Cash</i>	<i>Cash</i>	0.20%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 6.36% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy. The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?***

Yes:

In fossil gas       In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
**-turnover** reflecting the share of revenue from green activities of investee companies  
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

#### 1. Taxonomy-alignment of investments including sovereign bonds\*

#### 2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 100.0% of the total investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### ● What was the share of investments in transitional and enabling activities ?

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.13% and the share of investment in enabling activities was 4.77%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

#### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period: the percentage of investments with Taxonomy alignment was 5.31%

#### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **67.36%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

#### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 12.25%.

#### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

CAC 40 ESG Index is an equity index representative of the top 40 companies demonstrating strong Environmental, Social and Governance practices within the CAC Large 60 Index (Parent Index) representing the 60 leading stocks on the Paris stock market. The Index aims to deliver a reduced weighted carbon footprint and improved green-to-brown ratio compared to its Parent Index.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?
